Developed  
by our own  
engineers

# A small tool that makes a big difference

## Lift more efficiently by adding more lifting points to the same chain hoist

CTX Tandem Tool is designed to provide additional lifting points to a chain hoist. Once attached to the chain, it can be raised to the ideal unloading height and by that avoiding heavy lifts from low points.

- ASME
- Approved accessory by KITO and LIFTKET
- Approved working tool by customers within the renewable industry

Different clamp sizes are available to fit different hoists and load chain diameters. The clamps can only close on the right size chain. Fitting verification is also possible by the name plate of the hoist.

Safety feature: if pins are unintentionally inserted “wrong” (partially or inverted), an extra locking position ensures that the CTX Tandem Tool can still hold the full load.

Multi tool setup: Important not to exceed the hoist capacity.

Marking: According to standard, CE-marked

Standard: EN 13155

Part Code	Type	WLL ton	Dimensions mm	Weight kg
13.9967-350015	CTX Tandem Red	0,54	4,2 x 12	1,25
13.9967-350016	CTX Tandem Yellow	0,54	5,2 x 15	1,25
13.9967-350017	CTX Tandem Silver	0,54	7,2 x 21	1,25

# How it works

## CTX Tandem Tool

### Possibility of multi tool setup

The CTX Tandem Tool is designed with two clamps and two self-locking pins. The tool is easily and quickly attached to a chain.

#### Follow these steps:

1. Attach the CTX Tandem Tool to the lifting chain
2. Attach lifting accessory (optional)
3. Attach the load
4. Hoist the chain

Start again if you want to add more CTX Tandem Tools to the same chain.
